

## WE ARE GLAD TO HAVE MET YOU

Thank you again for visiting the **TOSS** booth at the “I Am Expat” fair. It was a pleasure seeing you.

We offered you Gladiolus bulbs as a small token of our appreciation for showing your interest in **TOSS** in Holland. Herewith we give you 5 tips on how to take care of these bulbs and turn them into beautiful flowers.

This is also what we do at **TOSS**. Just like these bulbs we can turn your career into a beautiful flower. We help you grow in your professional career path.

If you want to have more information on how we can help you grow, click here:

## TAKING CARE OF GLADIOLUS

Here are the 5 tips on taking care of gladioli:

1. It's best to plant them in April or May in a sunny spot.
2. The gladiolus' flowering period is from July through September 3.
- Plant the tubers about 10 cm deep and 10 apart.
4. Give them sufficient water.
5. The more sunlight the gladiolus gets, the happier it is.

Gladioli like to stand in nutritious garden soil, not too wet.  
Gladioli grow tall and are sensitive to wind.  
Plant them sheltered and together for support.
